

LOUISIANA NATURAL AND SCENIC RIVERS SYSTEM

PERMIT APPLICATIONPermit # 921 (Assigned by Department)

The Louisiana Department of Wildlife and Fisheries' Scenic Rivers program is authorized by LRS title 56, Chapter 9 Part II. This law requires permits authorizing activities in or affecting rivers that have been designated by the Louisiana Legislature as Natural and Scenic. Information provided on this form will be used in evaluating the application for a permit. Information in this application is made a matter of public record through issuance of a public notice. Disclosure of the information requested is voluntary, however, the data requested are necessary in order to communicate with the applicant and to evaluate the permit application. If necessary information is not provided, the permit application cannot be processed nor can a permit be issued.

APPLICANT INFORMATION

Name of Applicant	CHAD LOCKFIELD	Name of Agent (if any)	N/A
Address	804 TRADITION DRIVE	Address	
Address		Address	
City, State, Zip	COVINGTON, LA. 70433	City, State, Zip	
Phone	504-908-2993	Phone	

DESCRIPTION OF THE PROPOSED ACTIVITY

Brief summary of the description and purpose of the proposed activity (details to be attached as a separate document)

REPAIR AND MAINTAIN EXISTING BULKHEAD AND BOATSLIP, COMPLETE MISSING BULKHEAD PER THE ATTACHED DRAWINGS WITH BOAT DOCKS ON THE TCHEFUNCTE RIVER LOCATED @ 69105 RIVER BEND DRIVE, COVINGTON, LA., ST. TAMMANY PARISH

Is any portion of the activity complete? YES or NO (If yes, indicate month and year of completion)

COMPLETE DESCRIPTION OF PROPOSED PROJECT WITH DRAWINGS

The overall project will consist of four projects:

Project #1 – This will consist of repairing the existing bulkhead and replacing it as shown on the attached drawings. **Note: This has been preapproved already by LDWF.**

Project # 2: - Add Bulkhead to areas of the lot that were never done before and using existing fill to backfill erosion from the boat slip.

Project # 3: **Replace and repair existing boat slip pilings which has been preapproved by LDWF.** Then cover the slip and dredge out the slip.

Project #4: Add 450 square feet of dock to the bulkhead onto the Tchefuncte River.

Note: All drawings are attached for each project with an overall site plan.

BOBBY JINDAL
GOVERNOR

DEPARTMENT OF WILDLIFE AND FISHERIES

ROBERT J. BARHAM
SECRETARY

Dear Scenic River Permit Applicant:

Please review and concur on the following statement regarding the issuance of permits by the Louisiana Department of Wildlife and Fisheries. This agreement must be signed and returned before a Scenic River Permit can be issued.

"I have been advised and do understand that by applying for and accepting a Scenic Rivers permit issued by the Louisiana Department of Wildlife and Fisheries, I am being allowed to engage in an activity which would otherwise be prohibited by law or for which a permit is required. I understand that the permit is not a license and confers no property right upon me. I specifically agree to abide by all State and Federal fish and wildlife laws and regulations, and all State and Federal laws and regulations which relate to this permit or the permitted activity, and by all other terms and conditions of this permit. I understand that the permit for which I am applying may be suspended, annulled, withdrawn or revoked and that I may be assessed civil penalties, all in accordance with the provision of the Louisiana Administrative Procedure Act, and that I may be denied future permits as a consequence of my failure to fully and completely comply with the terms and conditions of the permit, as well as other laws and regulations pertinent thereto. If served with or notified of a cease and desist order signed by the Scenic Rivers Administrator, I agree to immediately and without delay cease all activities and operations which relate to the permitted activity or which are impacting the Scenic River, until such time as the matter can be resolved in an adjudicatory hearing pursuant to the Louisiana Administrative Procedure Act. I understand and agree that any permit issued to me by the Louisiana Department of Wildlife and Fisheries is in the nature of a privilege which is being voluntarily extended to me by the Department and the failure on my part to cooperate with the Department can result in the loss of the privilege conferred and the denial of future requests for permits. By accepting this permit, I evidence my agreement to be bound by all conditions and stipulations set forth herein."

ENVIROMENTAL ASSESSMENT OF CHAD LOCKFIELD'S PERMIT

The proposed environmental impact on the repair of the existing bulkhead and placement of missing bulkhead on the residential lot of Chad Lockfield will have only positive impacts and no negative. As it stands now the bulkhead is falling apart and the erosion is occurring with the old bulkhead as well and the areas un-bulkheaded. The project is designed to preserve the land from further erosion and stop trees from falling into the Tchefuncte River as to help it maintain its original beauty.

- 1) **Existing Land Use**- Resident lot. Positive Impact is to stop erosion of land into river. Land only for future residential house as it was designed for.
- 2) **Wilderness Qualities**- No effect
- 3) **Scenic Values**- Should improve as the existing bulkhead is caving into the river.
- 4) **Ecological Regimes**- Should improve as it stops erosion and run off.
- 5) **Recreational Use/Opportunities** – No effect as it is a private residential lot.
- 6) **Aestic Values**- Should improve as it stops erosion.
- 7) **Fish and Other Aquatic Life**- No effect
- 8) **Wildlife**- No effect
- 9) **Historical and Archaeological Resources**-No Effect
- 10) **Geological Resources**- No effect
- 11) **Botanical Resources**- No effect
- 12) **Water Quality and Quantity**- No addition fill used and since run off is stopped it should improve.
- 13) **Hydrologic Features**- No effect
- 14) **Cultural Resources**- No effect
- 15) **Economic Impact of Project**- No real effect other than creating work for the crew installing project.

**STEPS TAKEN BY APPLICANT TO MINIMIZE AND/OR OFFSET
POTENTIAL IMPACTS TO THE RIVER.**

- 1) Make sure ALL materials being replaced at project are removed from the site are not allowed to fall in the River. (Old Brick and Bulkhead)
- 2) All dredging material is placed on the existing slab 40 feet away from river till used to backfill new bulkhead to avoid any runoff into the Tchefuncte River.
- 3) Nothing else should be impacted since this project is simply to replace/repair old bulkhead and finish existing bulkhead to maintain the existing land and stop future erosion into the Tchefuncte River.

Signature

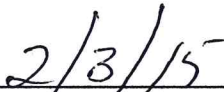

Date

REASONABLE ALTERNATIVES TO THE PROPOSED PROJECT

NONE, Without the project being completed future problems with erosion will continue to effect the scenic value of the river as well as the environmental impact. The project is design to stop all future impacts on the river.

ST. Tammany Parish
69105 River Bend Drive, Covington, La. 70422

Scale 1" equals 10'

Project 2a - Front Elevation
Bulkhead & Rock Fill the remaining
35'8" River Frontage on Tchabunde River

Scale = 1 in equals 2.6"

Materials used:

- 1) Crease Pilings w/ cable Tie locks
- 2) Wornized Sheetpiling "Treated"
- 3) Cable Wire for Tie locks

Front Elevation

35'8"

* Notes The Mean High & Low
Water level will move 2' either
way of Normal level based on
Normal Rise.

← Mean High Water level
← Regular Water level
← Mean Low Water level
← Bottom of Tchabunde River

Project 2b - Front Elevation
Bulkhead & Rock Fill the remaining
area along Drain Canal Ditch

Scale 1" equals 20'

Materials used:

- 1) Crease Pilings w/ cable Tie locks
- 2) Wornized Sheetpiling "Treated"
- 3) Cable Wire for Tie locks

Front Elevation

105'4"

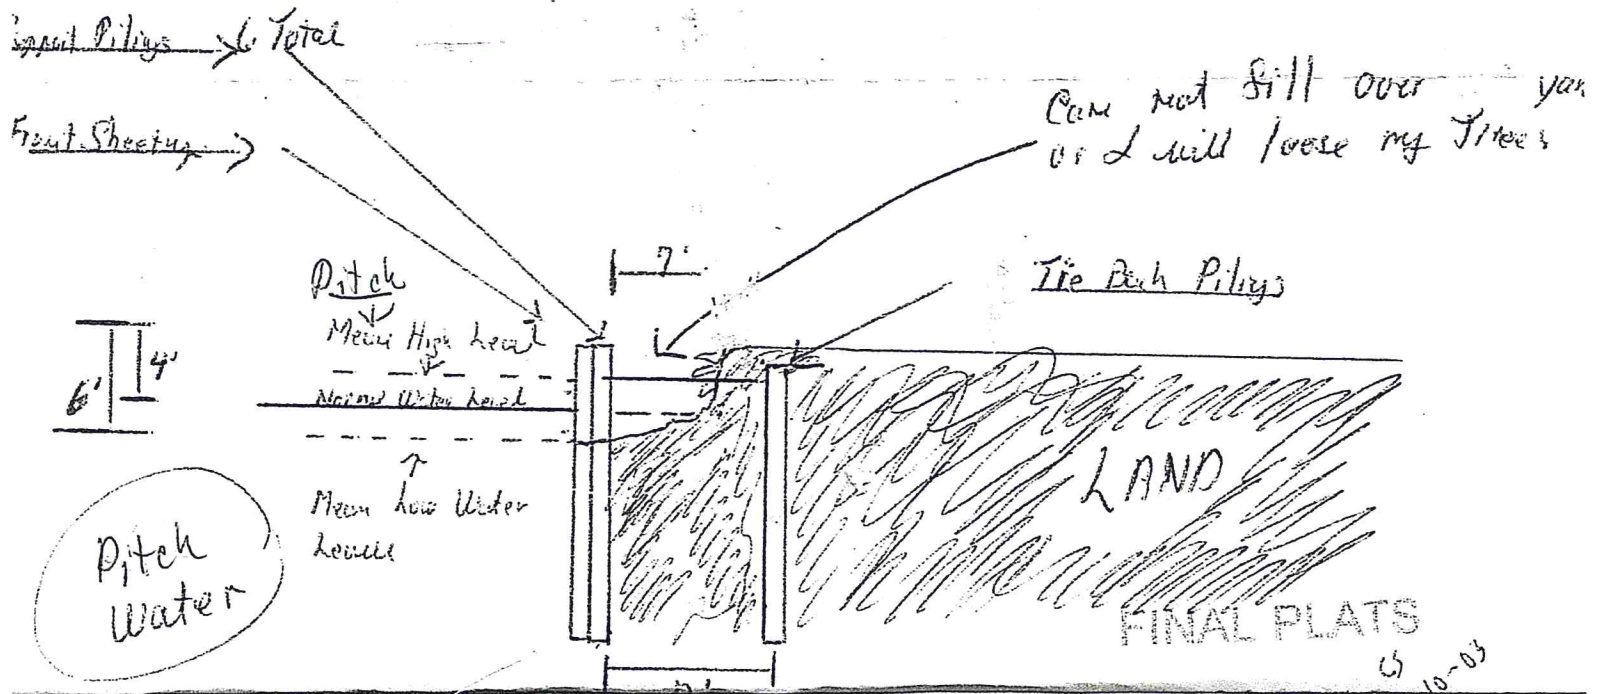

* Notes The Mean High & Low
Water level will move 2' either
way of Normal level based on
Normal Rise.

← Mean High Water level
← Regular Water level
← Mean Low Water level
← Bottom of Tchabunde River

Project 2b Side View Elevation

Bulkhead & Backfill the remaining 105' 4" of the side drainage ditch.

Scale = 5 feet Equal / in

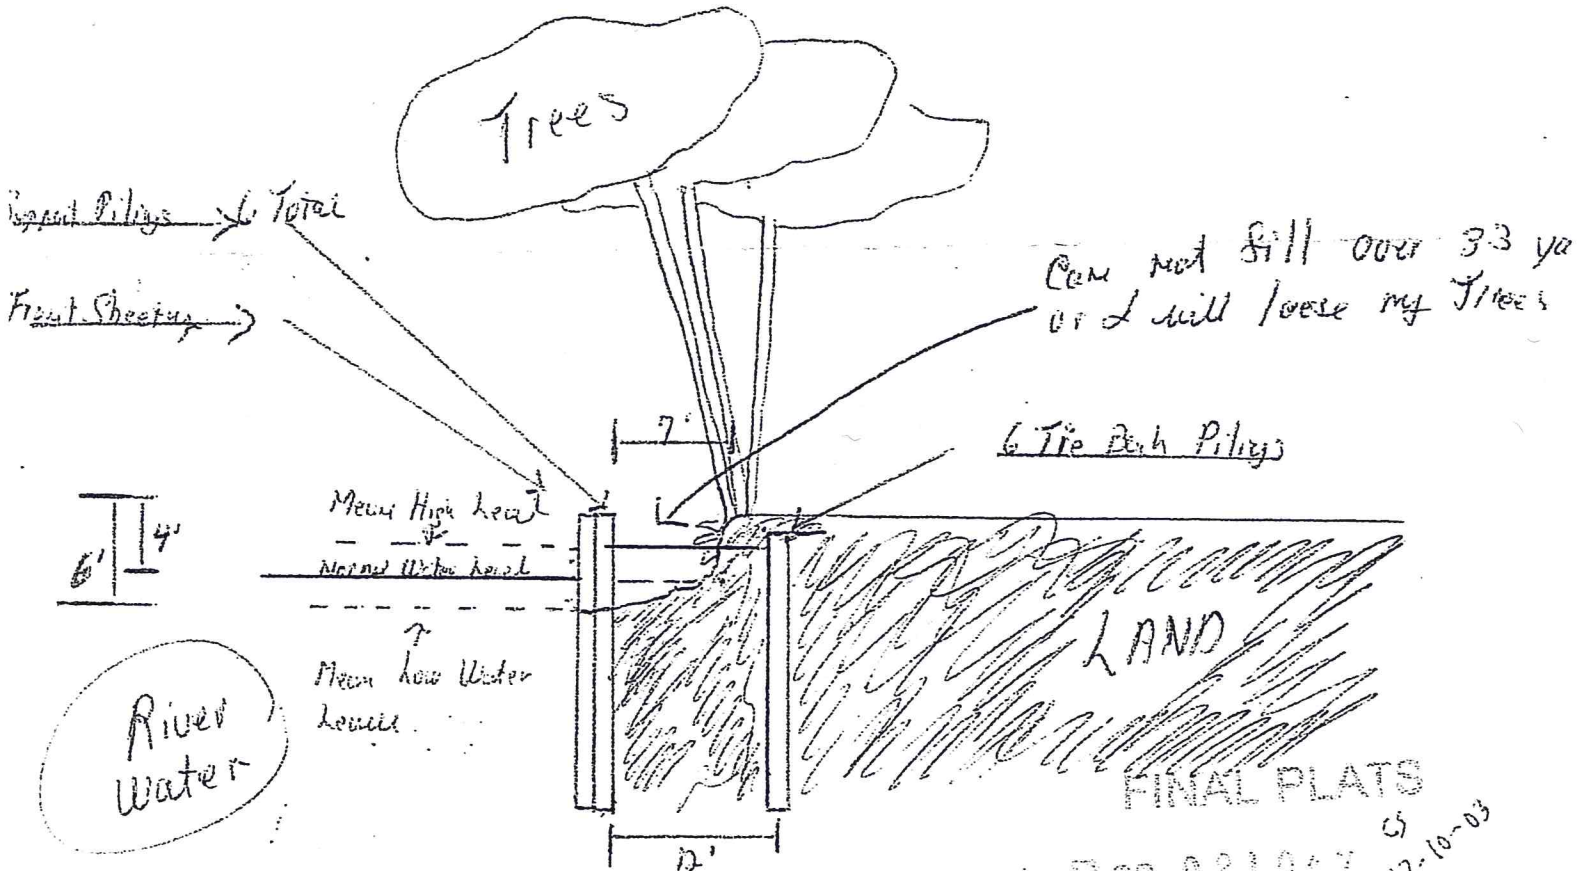

Note: Bulkhead along side drainage ditch; The length will be 105' 4". This new bulkhead will create a need of about 67 yards of fill from erosion which will be from the ditch being cleaned out.

Project #2 Side View Elevation

Bulkhead & Backfill the remaining 35'8" River Frontage on Tchetouche River

Scale = 5 feet Equal 1 in

Notes: The Dimensions vary because of erosion. The overall length is exact at 35'8". The Width goes from 3' to 7' in the center. 5' would be a good average for the whole wall. The Depth also varies from deepest fill 6' to 0' as it get shallower toward the 7' width. Good average of Depth would be 3'. Based on average this would be 35'8" x 5' x 3' = 54 yards. I probably can only fill about 33 yards or I will kill three Trees.
